

To whom it may concern

Subject: Recommendation and Testimonial – Sean Dornan

Sean was recruited by Corinth Pipeworks during 2017 and 2018 in the context of cooperation between Corinth Pipeworks and Wasco on a new wrap-on Concrete Weight Coating facility installed in Thisvi, Greece.

He secured and guaranteed exactly what he could truly do, he was always great in his cooperation with a team spirit, very analytical and to the point in his methodology and explanation of his action plan. From the very beginning, he gained the confidence of a very diverse multicultural and multidisciplinary team of Corinth Pipeworks, Wasco and the various customers he cooperated with, as the man who knows what he is talking about and how he is going to execute his plan.

Sean is considered to be our long term partner, by securing his presence in future project execution, consulting us in proper setup, management and troubleshooting of all demanding CWC applications we plan to tackle in the future.

I would strongly and undoubtedly recommend him to any prospective client covering a truly vast range of offered services.

Vassilis Gotsis
